

Twinbrook Parkway Pedestrian Improvements

Notice of Construction

Project Description:

In an effort to increase pedestrian safety in the Twinbrook neighborhood, two additional pedestrian refuge islands along Twinbrook Parkway will be installed.

The new pedestrian refuge islands will be installed at the following intersections:

- Twinbrook Parkway with Linthicum Street.
- Twinbrook Parkway with Pinneberg Avenue.

The islands will look similar to the existing pedestrian refuge islands at the intersections of Twinbrook Parkway with Shetland Street and with Marshall Avenue.

Purpose:

Pedestrian refuge islands assist pedestrians in crossing a road by reducing the amount of time pedestrians must spend in a crosswalk. Pedestrians become more visible to drivers in both directions, and refuge islands increase driver compliance with yield and speed laws.

Location:

Twinbrook Parkway with Linthicum Street and Twinbrook Parkway with Pinneberg Avenue.

Timeline:

A crew will construct the islands from Sept. 8-12, weather permitting. Construction will occur between 9 a.m. and 3 p.m. Crews will temporarily close one lane at certain periods and flaggers will wave traffic through the construction site.

Cost:

The project is funded by developer contributions reserved for the Twinbrook neighborhood.
